EQUIA Forte® HT

Time to go hybrid ...

Building on the success of EQUIA Forte, the new EQUIA Forte HT is a long-term bulk fill restorative system with enhanced mechanical properties, sound marginal seal and excellent handling. This makes EQUIA Forte HT a versatile and durable restorative solution, ideal for patients of all ages, including paediatric, geriatric and high caries risk patients.

- Superior bulk material for Class I & II restoration
- Moisture tolerant, no rubber dam needed
- Long processing time and short setting time, making the total procedure from application to coating only 3 mins, 25 seconds
- Posterior restoration are more natural and aesthetic
- Perfect for MIOC, including MID

10004866 - A2 10004811 - A3

Content: 100 Capsules, 1 bottle EQUIA Forte Coat

G-Premio BOND

One-component light-cured universal adhesive

Selecting the appropriate bonding for a given indication, and making sure to follow precisely the different procedure steps is not always easy. This is why GC developed G-Premio BOND - a one-bottle universal bonding compatible with all etching modes and which can be used not only for direct bonding, but also for repair cases & hypersensitivity treatment.

Moreover, GC wants to offer this ease of use & versatility without any impact on the quality of the bond. G-Premio BOND offers the advantages of a universal but with a top performance in all situations.

Because we believe in zero compromises.

TRYCARE PROMO PRICE

* Receive additional discount from nett dealer cost, offer to be passed onto customer.

OFFERS

Tooth Mousse and MI Paste Plus

How do GC Tooth Mousse and GC MI Paste Plus work?

Tooth Mousse and MI Paste Plus are ideal for at-home use. Simply apply them to any at-risk surfaces immediately before going to bed, and let the paste do the rest. Tooth Mousse and MI Paste Plus:

- help to neutralise the pH in your mouth
- prevent enamel from eroding
- keep your mouth healthy and ward off decay
- rapidly "desensitise" teeth

The flavour helps stimulate saliva flow, which rinses bacteria and food residues from the teeth and enhances the effectiveness of CPP-ACP(F). The longer CPP-ACP(F) is in the mouth, the more effective the result.

What's more, Tooth Mousse and MI Paste Plus are extremely effective at restoring minerals to eroded areas and where your enamel is thinner. MI Paste Plus even delivers fluoride to tooth enamel rejuvenating your smile whilst making your teeth stronger in the process. Ask your dentist which product is right for you.

Tooth Mousse and MI Paste Plus contain ingredients derived from milk casein. Patients who have a milk protein and/or hydroxybenzoates allergy should consult their dentist about alternatives

Initial LiSi Block Refills

Lithium Disilicate CAD/CAM Block for chairside solutions

Initial LiSi Block is a fully crystallized lithium disilicate block that delivers optimal physical and aesthetic properties without firing. This unique block features GC's proprietary High Density Micronisation (HDM) technology for CAD/CAM dentistry to deliver high wear resistance, smooth margins and aesthetic final results. This makes it an ideal time saving solution for single visit chairside treatment.

The unique ultrafine crystal makes it easy to grind and can be quickly milled in its fully crystallized stage. Thanks to Initial LiSi Block's exceptional properties, high gloss and natural opalescence can be obtained in few minutes by polishing only and restoration is then ready for luting. The aesthetics of your restoration will be maintained over time.

OFFERS

GC Composite Modelling Kit

Simplify your composite works using the brush technique

Direct composites can be tricky: they sometimes stick to your instruments, can be difficult to shape or smooth just the way you want, and at times you end up with visible margin lines...

Using a brush and a modeling resin to apply composites is a true game changer.

TRYCARE PROMO PRICE

from ~~£107.00~~ to £61.95

GC Composite Modelling Kit

Product Code: 10003387

Content: x1 GC Modelling Liquid 6ml, x2 Gradia Brush Holder, x5 Gradia Brush Flat, x5 Gradia Brush Round, x1 Mixing pad

D-Light® Pro Kit

TRYCARE PROMO PRICE

from ~~£1,418.60~~ to £795.00

Dual wavelength LED curing light

D-Light Pro is a high-performance dual-wavelength curing light developed to broaden your options: efficient light-curing of course, but much more besides.

It offers two curing programs with dual wavelength: High Power (1400mW/cm²) for all routine cases, and Low Power (700mW/cm²) when it is preferable to limit heat generation - for instance in deep cavities when the preparation comes close to the pulp. Thanks to the blue & violet LEDs used in these two curing modes, D-Light Pro can efficiently polymerise all light-cured dental materials.

Besides, D-Light Pro also offers a unique Detection Mode based on near-UV light only. This violet light will enable you to spot what is not always visible to the naked eye: from infected dentin to plaque, micro-leakage, fluorescent restorations or excess cement, cracks.

D-Light Pro Kit

Product Code: 70000008

* Receive additional discount from nett dealer cost, offer to be passed onto customer.
